

COMMUNITY CONSULTING

Building communities takes more than just engineering and design services. Citizen engagement, community goal-setting, comprehensive needs analyses, and quality communication all work together to enhance a community's quality of life. Olsson Associates offers comprehensive consulting services to help communities adapt to their changing needs. We serve as an extension of your staff, providing the workforce capacity to plan and implement projects and programs, effectively communicate with the public and stakeholders, and coordinate interdisciplinary projects.

COMMUNITY CONSULTING | SERVICES

- Project Management
- Strategic Planning
- Human Resources Assessments
- Interim Management Services
- Public Involvement
- Cost-Service Studies
- Retreat and Workshop Facilitation

We'll work with you to plan and implement projects, programs, and amenities your residents want and need. We understand the expectations residents, staff members, and governing bodies have with these types of projects. Progress is achieved only when those groups are involved, combined with communication and creative solutions.
