

RAIL SERVICES

Our primary objectives are tracking your railroad-related needs and spurring growth for your company.

At Olsson Associates, our national team of railroad experts is committed to providing high-quality services to successfully complete your project. From survey to hydrologic/hydraulic assessments and final track design, Olsson Associates is an outstanding resource for your company.

Our staff has conducted substantial design work for mainline and industrial track, completing projects in 24 states. This extensive experience with both public and private clients has given us a wide breadth of knowledge. It has also positioned Olsson Associates as a highly respected firm in the railroad industry.

Whether your project is small or large, you can be assured that Olsson Associates has the experience, resources, and dedication to exceed all of your expectations.
